**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: claims are allowable at least for the reason that the prior art does not teach or reasonably suggest the plurality of isolated characteristic oscillation modes, wherein there exist a reference oscillation mode which is a characteristic oscillation mode of a reference frequency, and an even numbered oscillation mode which is a characteristic oscillation mode of a frequency being approximate even number times the reference frequency as set forth in the claimed combination.

Niu et al (US 6,710,680 B2) discloses a micro-oscillating member comprising the plurality of isolated characteristic oscillation modes (Fig. 1), however, the prior art does **not** satisfy a reference oscillation mode which is a characteristic oscillation mode of a reference frequency, and an even numbered oscillation mode which is a characteristic oscillation mode of a frequency being approximate even number times the reference frequency as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
